PERSONAL PROJECTS

EasyLi (02/2020 – Present)

- https://github.com/yashgoyal2802/EasyLi
- It's an android app that helps the students to issue books from library more "easyLY"

Classroom Management Project (02/2020 – Present)

- In this project we will make a simulation of an OS to help the admin department in preparing an efficient time table i.e.managing of classrooms .

Silenzz App (04/2018 – 06/2018)

- It's an automation App that automates the process of changing modes of mobile phone from silent to general and back to silent based on the specific location.
- I completed the app and is working really fine.
- It helps in switching the mode to silent as soon as I am in college and resets it back to general as I reach home

Elders Connect (12/2019 – Present)

- This project is a Flutter based application which helps senior citizen to connect with their loved ones(juniors)
- https://github.com/nowmozillaclub/eldersconnect-senior
